LET AMERICA LEAD THE WAY

The following is an article written by William Randolph Hearst for the New York Enquirer in answer to a request from that newspaper:

SAN SIMEON, Calif., Nov. 11, 1938.

The New York Enquirer. 47 Walker street, New York.

THE shocking outrages perpetrated against harmless and helpless Jews in Germany are not the result of any momentary animal impulse, not the exhibition of any sporadic sentiment or action, not even directly attributable to the mad act of the irresponsible student who attacked the German government representative in Paris.

They are the inevitable consequences of the persistent preachments of hate and violence which have characterized European political and social life for a generation, if not for many generations.

The creed of violence and hatred is bearing its foul fruit, and the world is beginning to realize what a destructive and death-dealing fruit it is.

CERTAINLY all churches should unite to pray for liberality and tolerance, and all governments should unite to teach tolerance, justice and humanity.

All creeds should unite to preach peace on earth and good will towards men.

All nations—all races—should unite to practice these fundamental principles of religion and civilization.

The peoples of the earth must combine to agitate and labor for peace and unity—for friendship and mutual understanding-and not always for bitter competition and contention and antagonism and war.

All the world is sympathetic with oppressed peoples, and particularly with the persecuted Jews; but passive sympathy is not enough.

Even prayer must be supplemented. Education and action are needed.

WE AMERICANS must begin the great work, because we are the special beneficiaries of peace and tolerance and liberty.

We are free to speak.

We are free to act.

We have in our own life, and in our own Government, and in our own religious liberties, a glowing example of the blessings of brotherhood - of the practical as well as spiritual benefits of friendship, fellowship and freedom-of mutual respect and mutual esteem.

It is time for another crusade to carry throughout the world the bright lamp that shines for all equally on the shores of our free land-the lamp of liberty and enlightenment, of equality and justice, of religion and humanity. It is time for a world-wide crusade-a crusade for twentieth century civilization.

Let America light the lamp of liberty and lead the way.
